DETAILED ACTION

1. Applicant's request for reconsideration of the finality of the rejection of the last

Office action is persuasive and, therefore, the finality of that action is withdrawn.

Specification

2. The disclosure is objected to because of the following informalities: Drawing of Fig. 1 should clearly label every component represented in the blocks, number itself is not understandable for one of ordinary skill in the art.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

- 3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:
 - A person shall be entitled to a patent unless -
 - (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 1-5, 7-8, 26-35, 44-45, 46-49 and 36 are rejected under 35 U.S.C. 102(b) as being anticipated by Horvat [U.S. Pat. 4,591,823].

As to claim 1: Horvat discloses a device (12) for wireless access of vehicle information from a vehicle incident recording system which met by a vehicle transceiver (6), which is mounted in a vehicle for recording an over speed limit and tamper detecting system (see Fig. 2). The device (12) which can be mounted in a police patrol car (20) for mobile use, comprising, a transceiver (84, 90 in Fig. 3) the device includes a microprocessor system (70) Intel 8051 which contains an

information datalink (90) and an interface (38) (as shown in Fig. 3-7, and 12, col. 5, lines 24-26 and col. 8, lines 1-5) for receiving and displaying data from the remote vehicle incident recording system, a transceiver coupled at least indirectly to the information datalink, for transmitting data from the remote vehicle incident recording system to a secure location (26) separate from the device, system 12 transmits signal to trigger system 6, where is comparison against vehicle speed, and reporting violation signal to central processor 22 (as cited in Fig. 1 and col. 3, lines 64-68 and col. 4, lines 13-18).

Horvat mentioned that wherein the system (12) is a "always type" monitor transceiver, and it can be received any speed of a vehicle regardless of whether the vehicle is above the speed limit (as cited in col. 11 and lines 20-24), which means that system (12) can be selected any target vehicle and retrieved real time information of the target vehicle. Therefore, the claimed "interface for accessing data from a remote vehicle" is inherently included in the system, because the authority person should have an access code or password to input in the interface such as keyboard, in order to operate the system.

As to claim 36: Refer to claim 1 above.

As to claim 2-5: Horvat further disclose wherein an incident recording system (6) storing vehicle capturing (speed or tamper) and identification information (col. 4, lines 19-68) in the memory (50) (col. 5, lines 16-23).

As to claims 37,46, 48 and 49: Refer to claims 2-5 above.

As to claims 7-8: Horvat further discloses a visual display (44) (Fig. 5 and col. 4, line 30).

Application/Control Number: 09/758,645 Page 4

Art Unit: 2632

As to claim 47: Horvat further discloses wherein said information is storage in a device where is remotely located from said vehicle (which met by a computer 70 and the motor vehicle dept 26).

As to claims 26-35: Horvat further discloses wherein said transceiver provides a transmission link for initiating transmission of information to an information storage device (which met by a system 12 sends indicative signal to system 6, then system 6 report to central processor 22) (as cited in col. 4, lines 10-18) and the trigger is adapted to respond to the occurrence of a predetermined event (met by the event of over speed limit).

As to claims 44-45: Refer to claims 26-35 above.

Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claims 14-21, 40-42 and 50 are rejected under 35 U.S.C. 103(a) as being unpatentable over Horvat [U.S. Pat. 4,591,823].

As to claims 14-21: Horvat further discloses wherein a second transceiver (80,84) includes a download trigger for initiating downloading of information from said recording system (6) which including a time, a dynamic and vehicle control information (met by a speed of a

vehicle). Horvat does not specifically discloses wherein said download trigger is adapted to require input of an electronic access code, however, the monitor system (12) is mounted in a police patrol car, which means that only the authority person can be used that system. Therefore, it is obvious for one who having an authorization should have an access code, in order to operate the system.

As to claims 40-42 and 50: Refer to claims 14-21 above.

7. Claims 6, 9-11, 22-23, 38 and 51-52 are rejected under 35 U.S.C. 103(a) as being unpatentable over Horvat [U.S. Pat. 4,591,823] in view of Shamosh et al. [U.S. Pat. 5,144,661].

As to claims 6, 9-11: Horvat disclose all the limitation as describe above, Horvat silence to disclose wherein the vehicle information comprises video information, and display screen and audio information, Shamosh et al. teach a security protection system and method which comprises a video/audio recording unit (24) which could be display at the remote site as well (as shown in Fig. 1 and col. 4, lines 60-68). It would have been obvious of one having ordinary skilled in the art at the time the invention was made to have a video/audio display as taught by Shamosh et al. into the system disclosed by **Horvat** in order to increase the safety, because using video camera to record is more clearly and accurate.

As to claims 22-23: Shamosh et al. further disclose an encrypt (36) and decrypt (41)which use to convert information (as shown in Fig. 1-2 and col. 4, lines 20-28).

As to claim 38: Refer to claim 6 above.

Art Unit: 2632

As to claims 51-52: Refer to claim 22-23 above.

Conclusion

- 8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
 - --- Ricci [U.S. Pat. 5,847,661] disclose a Vehicle Data Acquisition System
 - --- Davis et al. [U.S. Pat. 5,935,190] disclose a Traffic Monitoring System.
 - ---Gehlot [U.S. Pat. 6,163,277] discloses system and method for speed limit enforcement.
